

Md Danish Iftekhar

AI Full-Stack Developer | React | TypeScript | Python | FastAPI | Gemini API
danish90654@gmail.com | +91-9065440786 | GitHub | LinkedIn | Portfolio

Professional Summary

AI Full-Stack Developer experienced in building AI-powered web applications using React, TypeScript, Python, FastAPI, Gemini API, Supabase, and modern deployment tools. Skilled in AI API integration, image processing, model inference, backend APIs, authentication, databases, and full-stack development.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS

AI/ML: Gemini API, MediaPipe, ONNX Runtime Web, image processing, model inference, prompt engineering, confidence scoring

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, Framer Motion, React Hook Form, Zod

Backend: FastAPI, Express.js, Node.js, REST APIs, Pydantic, SQLAlchemy

Database/Auth: Supabase, PostgreSQL, SQLite, authentication, Row Level Security

Tools/Cloud: Git, GitHub, Cloudinary, Vercel, Render, npm, Pytest, Vitest

Projects

AuraPalette – AI Skin Tone Style Advisor *React, TypeScript, MediaPipe, ONNX Runtime Web, Vite, Vitest*

- Developed an AI-powered style recommendation app that analyzes uploaded images and suggests clothing, makeup, jewelry, hair colors, and seasonal palettes.
- Implemented browser-based image processing, confidence scoring, image quality warnings, local saved results, downloadable palette cards, and an ML training pipeline scaffold.

HealthSaathi – AI Medical Report Explanation App *React, TypeScript, FastAPI, Gemini API, Supabase*

- Built a Gemini-powered healthcare app that explains medical reports in simple language with privacy-aware handling and medical safety disclaimers.
- Developed FastAPI backend APIs for report analysis, health tips, doctors, labs, location-based features, alerts, deployment, and security documentation.

Portfolio Web App with AI Chat Assistant *React, TypeScript, FastAPI, Supabase, Cloudinary, Gemini API*

- Created a full-stack portfolio platform with an AI chat assistant designed to answer recruiter and client queries.
- Built admin CRUD features, contact forms, file uploads, backend validation, rate limiting, Supabase data handling, and Pytest-based backend testing.

YouTube Subtitle Encoder *Python, yt-dlp, ReportLab, Tkinter*

- Built a local desktop and CLI tool that converts YouTube video or playlist subtitles into clean PDF transcripts.
- Supported manual subtitles, automatic captions, timestamps, playlist batch processing, combined PDF export, and local execution without paid APIs.

Education

Bachelor of Technology in Computer Science and Engineering, Specialization in Data Science *Expected*

Graduation: 2028

Jamia Millia Islamia

CGPA: 7.52/10

Additional Information

Relevant Areas: Artificial Intelligence, Full-Stack Development, REST APIs, Image Processing, Web Deployment, Database Management

Target Roles: AI Intern, AI Developer Intern, Full-Stack AI Developer Intern, Python Backend Intern
