

Md Danish Iftekhar

AI Full-Stack Developer | Generative AI | NLP | Applied Machine Learning

danish90654@gmail.com | +91-9065440786 | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

AI full-stack developer and data science student building production-oriented conversational AI and web products. Experienced with multilingual NLP, generative AI, speech-to-text, human-in-the-loop workflows, secure APIs, Supabase/PostgreSQL, and responsive React/Next.js interfaces.

TECHNICAL SKILLS

AI / ML: Machine Learning, Deep Learning, NLP, Generative AI, LLM integration, prompt engineering, speech-to-text, Gemini API

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, Framer Motion

Backend: FastAPI, Node.js, Express.js, REST APIs, Pydantic, validation and testing

Data / Cloud: Supabase, PostgreSQL, Row Level Security, Cloudinary, Vercel, Render

Integrations: Meta WhatsApp Cloud API, Telegram Bot API, Twilio, authentication, webhooks

EXPERIENCE AND LEADERSHIP

Team Lead and AI Full-Stack Developer - PhoneERP Internship Project

June 2026 - August 2026 | Team project | Live application

- Led development and verification of a production prototype that converts Hindi, Hinglish, and English text or voice orders into editable action cards for owners, packers, and delivery teams.
- Built and hardened Gemini transcription/extraction, deterministic validation, catalog matching, role-based access, Supabase persistence, customer tracking, invoices, and WhatsApp/Telegram intake workflows.

SELECTED PROJECTS

PhoneERP - Conversational Order Operations | Next.js, TypeScript, FastAPI, Python, Supabase, Gemini

- Created a human-reviewed conversational commerce workflow spanning order capture, AI understanding, fulfilment, tracking, billing, and multichannel integrations.

AuraPalette - AI Skin Tone Style Advisor | React, TypeScript, MediaPipe, ONNX Runtime Web

- Developed privacy-first image analysis, palette recommendations, confidence scoring, quality checks, result history, and PNG exports.

HealthSaathi - AI Medical Report Explanation | React, TypeScript, FastAPI, Gemini API, Supabase

- Built a safety-aware healthcare MVP for report uploads, educational explanations, report history, health guidance, and secure backend processing.

Portfolio Platform with AI Assistant | React, TypeScript, FastAPI, Supabase, Cloudinary

- Built editable portfolio content, project case studies, secure admin APIs, media workflows, contact handling, and a grounded AI assistant.

EDUCATION

B.Tech in Computer Science and Engineering
Specialization in Data Science | Jamia Millia Islamia

Expected 2028
CGPA: 7.52/10

FOCUS

Applied AI, machine learning, NLP, generative AI, conversational systems, full-stack product engineering, backend APIs, and production deployment.
